

Connector Operator API

Introduction

This document describes API exposed by *Connector* to the *Operator*.

The key words **MUST**, **MUST NOT**, **REQUIRED**, **SHALL**, **SHALL NOT**, **SHOULD**, **SHOULD NOT**, **RECOMMENDED**, **MAY**, and **OPTIONAL** in this document are to be interpreted as described in [RFC 2119](#).

Outgoing messages

Messages sent from the game client to the iframe parent via [postMessage](#).

Example of sending message:

```
window.addEventListener("message", (event) => {
  const {message, data} = event.data;
  switch (message) {
    case "reload":
      window.location.reload();
      break;
  }
});
```

Message	Data	Description
authenticated	{balance, token, currency, sessionId}	Game has authenticated player
gameLoaded	{progress}	Game has finished loading. Progress is 0-100
started	-	Game has started (i.e. slot started spinning)
wager	{wager, balance, roundId}	Wager was placed
stopped	{roundId, balance, finalWin}	Game has stopped (i.e. slot stopped spinning). <code>finalWin</code> is present when round is completed
recovered	{roundId, wagers}	Game round was recovered from incomplete state
balance	{balance}	Balance changed
exit	{lobbyUrl}	Quit the game and return to the lobby. Requires passing <code>&customExit</code> flag in the game launch URL
reload	-	Reload the game. Requires passing <code>&customReload</code> flag in the game launch URL
deposit	-	Display deposit popup. Requires passing <code>&customDeposit</code> flag in the game launch URL
betChanged	{bet}	<code>setActiveBet</code> method was called by the game client
muted	-	Game audio was muted
unmuted	-	Game audio was unmuted

Message	Data	Description
turboToggled	{value}	Turbo mode was toggled
autoplayToggled	{value}	Autoplay was toggled
paytableToggled	{value}	Paytable was toggled
helpToggled	{value}	Help screen was toggled
aboutToggled	{value}	About screen was toggled
replayShown	replay	Replay presentation was started, i.e. <code>show</code> method was called from Game History list
replayHidden	-	Player stopped replay screen presentation

Incoming messages

Messages sent from iframe parent to the game client via [postMessage](#).

Example of sending message:

```
const iframe = document.getElementById("iframe").contentWindow;
iframe.postMessage({message: "freeze", data: {test: 123}}, "*");
```

Message	Data	Description
freeze	-	Shows overlay blocking the game interactivity and stopping autoplay
unfreeze	-	Hides overlay blocking the game interactivity
mute	-	Mutes audio
unmute	-	Unmutes audio
turboToggle	{value: true}	Toggle turbo mode on/off
paytableToggle	{value: true}	Toggle paytable on/off
helpToggle	{value: true}	Toggle help screen on/off
aboutToggle	{value: true}	Toggle about screen on/off
play	{action: "main", bet: 2, cheat: "bonus"}	Triggers the game
stopAutoplay	-	Stops autoplay (without the overlay)
balanceChanged	{balance: 1000}	Updates balance in the game to the specific amount
refreshBalance	-	Triggers an async balance update in the game
